philosophy · arts · human rights · literature · latin · american studies · social linguistics · communication · education · history · cultural heritage · architecture · social inclusion · racism · disabilities · urban poverty and inequalities
CAPABILITIES AND OPPORTUNITIES

UNSAM OFFERS ACADEMIC TRAINING, RESEARCH AND INNOVATION

We believe that research is the gateway to bring in lasting changes to the life of people and society as a whole. Our main distinguishing features are interdisciplinarity, transfer of knowledge, quality and relevance, and innovation. In the face of emerging and complex problems we seek to forge new linkages and offer alternatives for the future.

UNSAM produces vaccines, transforms the territory with educational, social and environmental policies, sets up laboratories in space, incubates technology-based companies, studies the brain from biology, psychology and physics, leads discussions in the social sciences at the local and regional level, produces quality artistic events, among many other things, training new generations in an environment of permanent creativity and national and international academic collaboration.
